

## Personal Statement

I am grateful every day for the opportunity to work as an ophthalmologist. Vision is a precious commodity, and it is a pleasure to work with my patients to protect and care for their eyes.

Staying on top of new treatments and maintaining state of the art equipment is another source of pride for me at the clinic. I am active both in attending, and teaching at Continuing Education events.

Since 2010, I have been actively fundraising for the Foundation Fighting Blindness. The research projects they fund bring hope for a cure for many retinal diseases.
